

INTRODUCTORY CONCEPTUAL DESIGN SERVICES

NYC Communications LLC is a low-voltage electrical contractor providing services utilizing our *Single Point of Contact* solution for Information Technology Transport Systems. Our assessment of Voice, Data and Video Converged Network System requirements, and our associated Enterprise Cost / Benefit analysis led to the development of our **Introductory Conceptual Design Services**.

NYC Communications LLC Introductory Conceptual Design Services begins with the implementation of a two-step process consisting of the Planning Phase and the Schematic Design Phase.

During the Planning Phase of the project, much of the emphasis is on the higher-level analysis; feasibility studies, program (how the facility will be used), and budgeting.

Based on the program and budget, a Conceptual Design is prepared for review by the owner. Sketches, graphics, general design criteria, and preliminary cost estimates are completed.

Upon owner approval NYCC will perform the responsibilities required for the detailed Design, Integration, Implementation and Project Management of our Information Technology Transport System Services and their related Telecommunications Infrastructure components.

As you review our **FREE** Introductory Conceptual Design Services – we feel you will agree that NYC Communications LLC offers you much more than an economical solution to all of your telecommunications needs. The combination of our experienced Design, Integration, Implementation and Project Management team, as well as our support resources, allows us to complete major projects and installation work within minimal time – without confusion. In addition, our *Single Point of Contact* solution to manage the entire project will enable you to reduce total project costs by at least 15%.

NYC Communications LLC looks forward to working with you on this strategic project. Our methodologies, industry experience and customer commitment, provide the basis for an excellent working relationship.

NYC Communications LLC provides a one-year warranty for new installation work. In addition, NYCC will perform all work in accordance with ANSI/TIA/EIA Standards and local building electrical codes.

NYC Communications LLC extends our appreciation for this opportunity to be of service to you. We trust that you will find us– NYCC as your choice and solution to design and manage all your telecommunications needs.
